KATALOG 2026

Dichtungen für Fenstersysteme

aus Kunststoff, Aluminium, Holz-Alu und Stahl

Fenster halten Jahrzehnte, ihre Dichtungen nicht. Sie gleichen Bautoleranzen aus, halten Wind, Regen und Kälte draußen und sind jeden Tag UV-Licht, Hitze und Frost ausgesetzt. Irgendwann werden sie hart, spröde oder rissig – dann zieht es, die Scheiben beschlagen und die Heizkosten steigen.

Die gute Nachricht: Ein neues Fenster brauchen Sie dafür nicht. Mit einer neuen Dichtung schließt Ihr Fenster wieder dicht – eine kleine Investition mit großer Wirkung.

UNSER SORTIMENT

Anschlagdichtungen

Seite 7–77

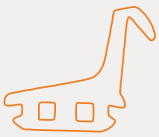

Sitzen zwischen Flügel und Rahmen und dichten das geschlossene Fenster rundum ab.

Verglasungs-dichtungen

Seite 78–117

Halten die Glasscheibe im Rahmen und dichten sie zum Profil hin ab.

Mitteldichtungen

Seite 118–163

Trennen im Falz kalte Außenluft vom warmen Innenbereich – gegen Zugluft und Tauwasser.

Dachflächenfenster

Seite 164–165

Ersatzdichtungen für Dachfenster vieler Hersteller, zum Beispiel Velux und Roto.

Nicht jedes Profil aus dem Katalog finden Sie in unserem Onlineshop. Fragen Sie einfach bei uns an – wir liefern auch diese Dichtungen.

Dichtungsrahmen und Ecken

Für viele Profile bieten wir vorgefertigte Ecken und Rahmen nach Maß an. Ob es sie gibt, zeigt das Eckensymbol beim Artikel. Ecken sind nicht im Onlineshop erhältlich.

Anfrage- und Bestellformular
QR-Code scannen, ausfüllen und per E-Mail oder WhatsApp zurückschicken. Mehr auf S. 120.

Über uns

Wir sind ein Familienbetrieb aus Hamburg und haben uns auf Ersatzdichtungen spezialisiert. Unsere Profile stammen von GfA, einem der führenden Dichtungshersteller. Bei uns bekommen Sie sie auch als Privatkunde und in kleinen Mengen – geliefert in 5-m-Längen oder im 25-m-Bund.

Sie wissen nicht, welche Dichtung passt?

Schicken Sie uns ein Foto Ihres Profils oder ein kurzes Stück der alten Dichtung per Post – wir suchen den passenden Ersatz für Sie heraus.

LEGENDE

So lesen Sie unseren Katalog

1 Antidehnungsfaden „CC“
Die Dichtung hat einen eingebauten Faden und lässt sich beim Einbau nicht dehnen. Erkennbar auch am „CC“ hinter der Artikelnummer.

2 Spezialecken und Rahmen
Für dieses Profil liefern wir vorgefertigte Ecken oder fertigen Rahmen nach Maß – auf Anfrage.

3 Lagerfarben
In diesen Farben ist das Profil auf Lager.

4 Alternativabbildung
Zeigt die modernisierte Form oder den Lieferzustand der Dichtung.

5 Artikelabbildung
Querschnitt des Profils auf Millimeterraster.

6 Lage des Antidehnungsfadens
Der rote Punkt zeigt, wo der Faden im Profil sitzt.

LAGERFARBEN

- beige
- braun
- grau
- dunkelgrau
- schwarz
- transparent
- weiß

Ab 5 m Lagerlänge sofort lieferbar. Sonderfarben fertigen wir ab 200 m.

MASSSTAB

1 Kästchen
= 1 mm

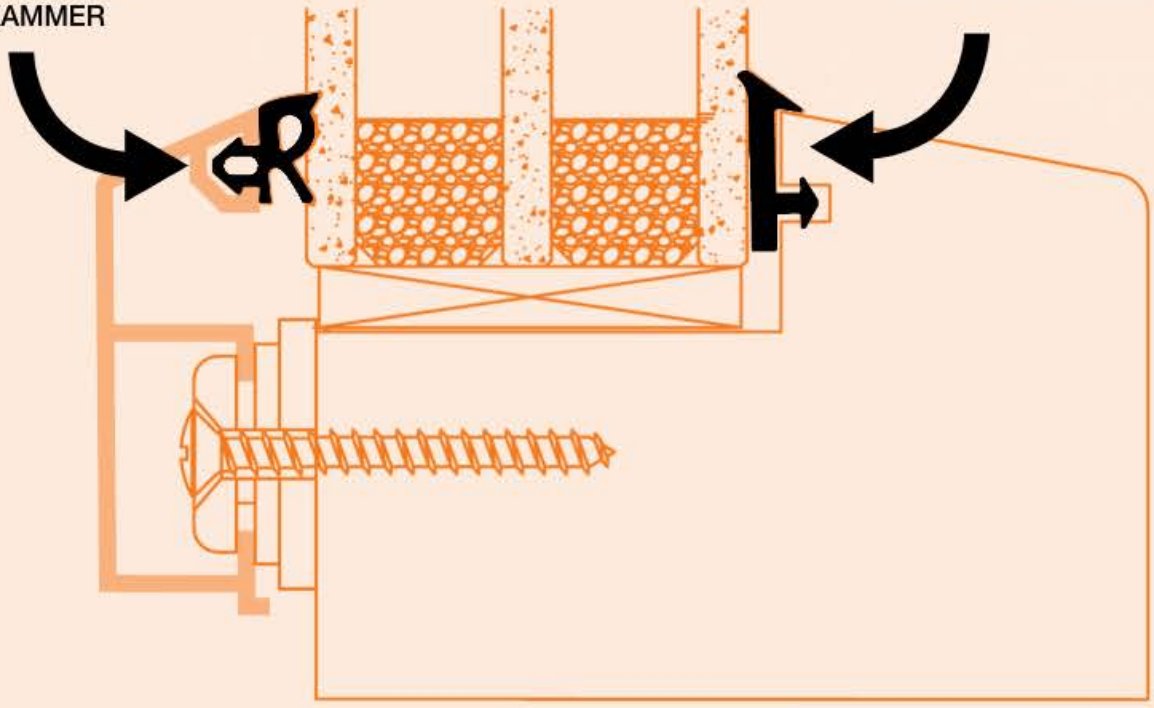

Beim Ausdruck in Originalgröße (100 %, nicht „An Seite anpassen“) sind alle Profile im Maßstab 1:1 abgebildet.

Spezialecken: saubere Ecken ohne Gehrungsschnitt

Die Ecken sind bereits fertig geformt. Sie setzen sie ein, passen das gerade Profil dazwischen ein und verkleben die Stöße mit unserem CA-Kleber.

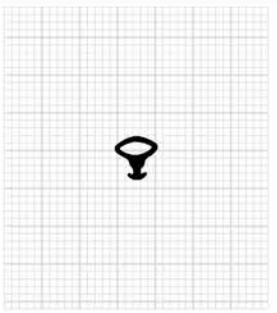

Praktisch bei vielen Fenstern: Die Ecken bleiben gleich, nur das gerade Profil wird zugeschnitten.

Zum Anfrageformular
Ob es Ecken gibt, zeigt das Eckensymbol beim Artikel. Mehr auf S. 120.

Hohlkammer oder Lippe?

Anschlagdichtungen gibt es in zwei Grundformen. Ein Blick auf den Querschnitt Ihrer alten Dichtung zeigt, welche Sie brauchen.

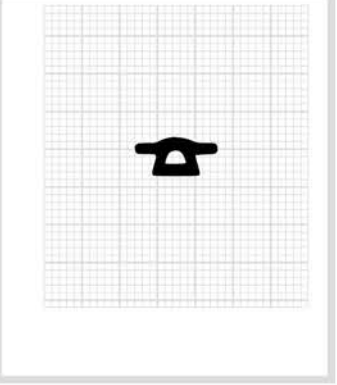

Hohlkammerprofil
Der Dichtkörper ist ein geschlossener Hohlraum. Beim Schließen wird er zusammengedrückt und federt danach zurück. So gleicht er auch größere oder ungleichmäßige Spalten aus.

Lippenprofil
Eine biegsame Lippe legt sich beim Schließen an den Rahmen an. Das Fenster schließt leichtgängig.

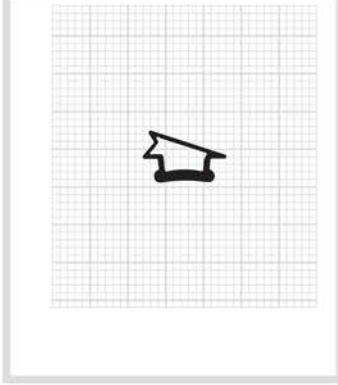

Tipp: Ersetzen Sie Ihre Dichtung durch die gleiche Bauform. Sonst stimmt der Schließdruck nicht mehr.

Lippenprofile finden Sie ab S. 27.

Jede Dichtung ist anders. Wir finden Ihre.

Viele Profile sehen sich auf den ersten Blick ähnlich, unterscheiden sich aber in Fuß, Lippe oder Kammer oft nur um Millimeter. Deshalb verlassen Sie sich am besten nicht allein aufs Messen.

So einfach geht‘s:

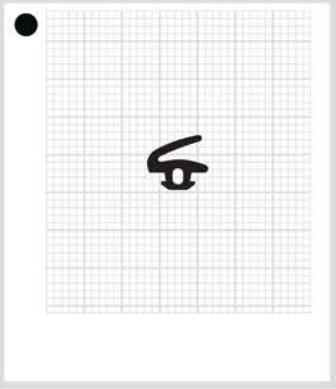

Schneiden Sie ein kurzes Stück Ihrer alten Dichtung ab.
Stecken Sie es in einen Briefumschlag und legen Sie einen Zettel mit Ihrer Telefonnummer oder E-Mail-Adresse dazu.
Wir vergleichen es mit unserem Sortiment und melden uns mit dem passenden Ersatz.

Gleit- und Pflegespray

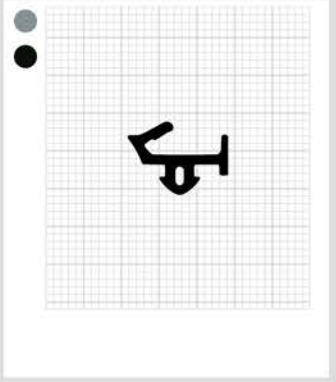

Silikonfrei. Hält Ihre Dichtungen lange elastisch und schützt sie vor UV-Strahlung und Ozon – so werden sie nicht rissig oder spröde.

Gepflegte Dichtungen kleben bei Frost nicht am Rahmen fest.

Antidehnungsfaden „CC“

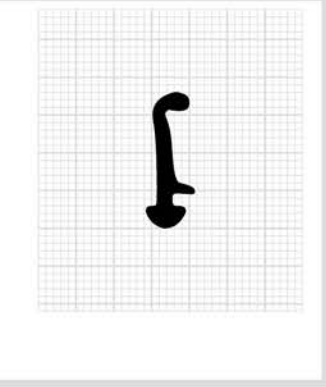

Ein eingebauter Faden verhindert, dass sich die Dichtung beim Einbau dehnt. So zieht sie sich später nicht zusammen – und an den Ecken entstehen keine Lücken.

Erkennbar am „CC“ hinter der Artikelnummer und am roten Symbol oben rechts in der Kachel.

Gehrungsschere: saubere Ecken

Exakte Gehrungsschnitte an Ecken und Rahmenverbindungen sind die Grundlage für einen dichten Dichtungseinbau. Passgenaue Gehrungen schließen ohne Spalt – Zugluft und Feuchtigkeit bleiben draußen.

Ihre Vorteile

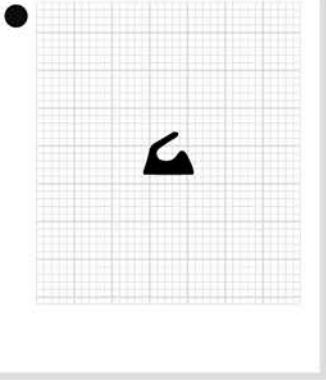

- Präzise Schnitte ohne Quetschen oder Ausfransen
- Spart Zeit bei der Montage
- Weniger Verschnitt, sauberes Ergebnis

Ganz ohne Gehrung? Mit unseren vorgefertigten Spezialecken müssen Sie keine Ecken schneiden – mehr auf S. 120.

Ausreißsteg: Schließdruck selbst anpassen

Manche Dichtungen haben einen dünnen Steg, der die Dichtlippe stützt. Mit Steg drückt die Lippe kräftiger gegen den Rahmen, ohne Steg gibt sie leichter nach.

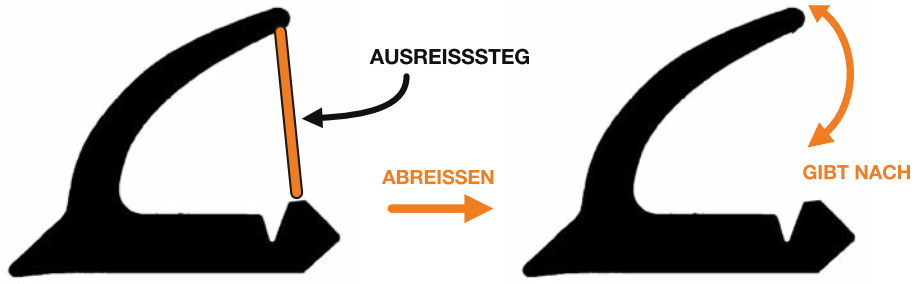

So gehen Sie vor

Setzen Sie die Dichtung zuerst mit Steg ein und schließen Sie das Fenster. Lässt es sich nur schwer schließen, reißen Sie den Steg ab – danach schließt das Fenster mit weniger Kraft.

> **Gut zu wissen:** Abgerissen ist abgerissen. Testen Sie deshalb immer erst mit Steg.

MIT AUSREISSSSTEG
Steg stützt die Lippe – kräftiger Schließdruck

STEG ABGERISSEN
Lippe gibt leichter nach – weniger Schließdruck

Welche Dichtung passt zu meinem Fenster?

Diese Profile werden häufig in Fenstern der folgenden Hersteller eingesetzt. Die Übersicht hilft beim ersten Suchen – viele Fenstersysteme wurden über die Jahre aber verändert. Vergleichen Sie deshalb immer die Form mit der Abbildung im Katalog. Im Zweifel schicken Sie uns ein Foto oder ein kurzes Stück Ihrer Dichtung, wir helfen gern.

Farben und Lieferformen

Unsere Lagerfarben

- beige
- braun
- grau
- dunkelgrau
- schwarz
- transparent
- weiß

Die Farbpunkte bei jedem Artikel zeigen, in welchen Farben das Profil auf Lager ist – ab 5 m sofort lieferbar.

Andere Farbe gewünscht? Sonderfarben fertigen wir ab 200 m. Fragen Sie uns einfach an.

So liefern wir

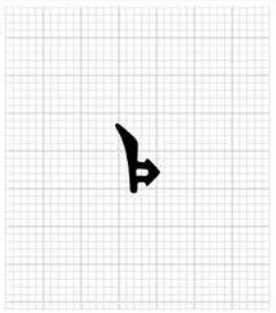

5-m-Länge
ideal für einzelne Fenster

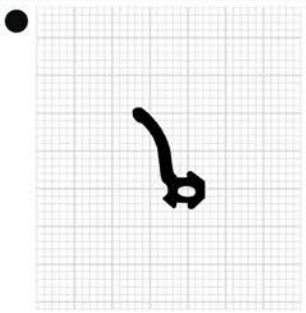

25-m-Bund
für mehrere Fenster oder Türen

Bestellmenge: Rechnen Sie die Länge aller Fenster zusammen und runden Sie auf volle 5 m auf. Beispiel: Sie brauchen 7,20 m – dann bestellen Sie 10 m.

Am besten alle auf einmal

In einem Fenster arbeiten meist mehrere Dichtungen zusammen:

1. Anschlagdichtung außen
2. Mitteldichtung
3. Anschlagdichtung innen
4. Verglasungsdichtungen innen und außen

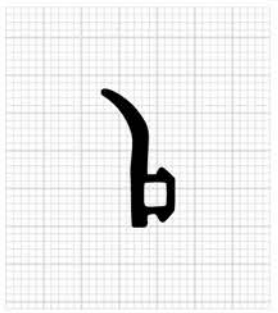

Alle Dichtungen eines Fensters sind gleich alt und jeden Tag denselben Belastungen ausgesetzt. Ist eine hart oder rissig, sind die anderen meist auch nicht mehr in gutem Zustand.

Tauschen Sie deshalb am besten alle auf einmal. So schließt das Fenster wieder gleichmäßig dicht – und Sie haben die Arbeit nur einmal.

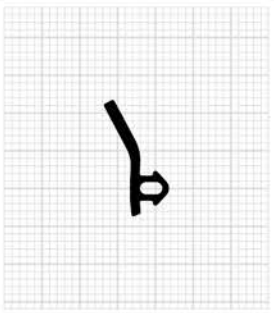

Nicht sicher, was in Ihrem Fenster steckt? Das hängt vom Fenstersystem ab – nicht jedes Fenster hat zum Beispiel eine Mitteldichtung. Schicken Sie uns Fotos Ihrer Dichtungen, wir suchen Ihnen alle passenden Profile heraus.

Ihr Profil auf einen Blick erkennen

Drucken Sie diese Seite in Originalgröße aus (100 %, nicht „an Seite anpassen“). Legen Sie ein Stück Ihrer alten Dichtung im Querschnitt auf das Raster und vergleichen Sie Form und Größe mit den Abbildungen im Katalog.

Darauf kommt es an:

- **Fußbreite: Sie entspricht der Nutbreite im Rahmen.**
- **Höhe: Wie weit steht die Dichtung aus der Nut heraus?**
- **Form: Hohlkammer, Lippe oder seitlicher Anschlag?**

Unsicher? Schicken Sie uns ein Foto mit Lineal daneben, wir helfen Ihnen weiter.

Senden Sie Ihr Foto an:

TPE-Dichtungen: langlebig und recycelbar

Viele unserer Dichtungsprofile bestehen aus TPE (thermoplastisches Elastomer). Der Werkstoff ist elastisch wie Gummi, lässt sich aber verarbeiten wie ein Kunststoff – mit Vorteilen für die Funktion und für die Umwelt.

Recycelbar

Klassischer Gummi wie EPDM wird vulkanisiert, also chemisch vernetzt – das lässt sich nicht umkehren. TPE wird beim Erwärmen wieder formbar und kann mehrfach eingeschmolzen werden.

Geschredderte Dichtungen wiederverwenden

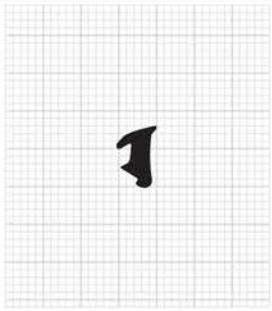

Alte Dichtungen und Produktionsreste lassen sich zu Granulat zerkleinern. Dieses Mahlgut fließt zurück in die Produktion – aus einer Dichtung wird ein neuer Rohstoff statt Abfall.

Nachhaltig

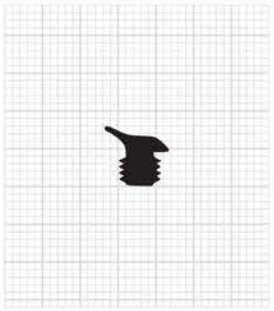

- Weniger Energie, weil die Vulkanisation entfällt
- Weniger neue Rohstoffe durch den Materialkreislauf
- Langlebig, elastisch und witterungsbeständig
- Dichte Fenster senken die Heizkosten

Mit TPE entscheiden Sie sich für eine Dichtung, die zuverlässig abdichtet und Ressourcen schont.

Was bedeuten die Zusatzangaben?

Kleingedrucktes erklärt

CC: Die Dichtung hat einen eingebauten Antidehnungsfaden. Sie lässt sich beim Einbau nicht in die Länge ziehen, dadurch entstehen später keine Lücken.

2K: Ein Zwei-Komponenten-Profil besteht aus zwei unterschiedlich harten Materialien. Der feste Teil sorgt für sicheren Halt, der weiche Teil dichtet ab.

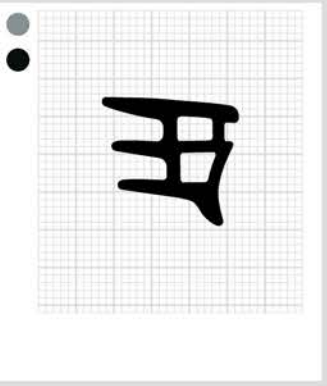

Shore A: So wird die Härte von elastischen Werkstoffen angegeben. Je höher der Wert, desto fester die Dichtung.

mit Ausreißsteg: Ein schmaler Steg, den Sie abreißen können, wenn das Fenster zu schwer schließt (mehr dazu auf S. 55).

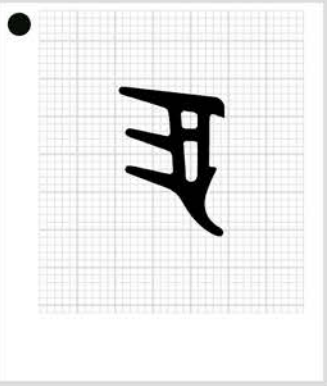

Farbpunkte: Diese Farben haben wir auf Lager (siehe Legende S. 5).

Gleit- und Pflegespray

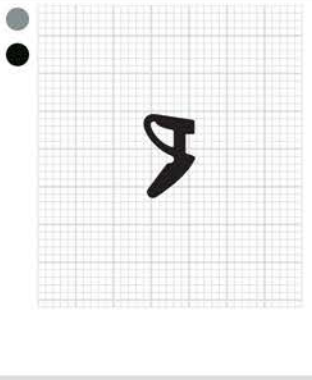

Silikonfrei. Hält Ihre Dichtungen lange elastisch und schützt sie vor UV-Strahlung und Ozon – so werden sie nicht rissig oder spröde.

Gepflegte Dichtungen kleben bei Frost nicht am Rahmen fest.

Dichtung wechseln in 5 Schritten

1. Alte Dichtung herausziehen. Am besten an einer Ecke beginnen.

2. **Nut reinigen. Schmutz und Reste entfernen, damit die neue Dichtung sauber sitzt.**

3. **Neue Dichtung einsetzen, ohne zu ziehen. Gedehnte Dichtungen ziehen sich später zusammen, und es entstehen Lücken. Der Dichtungseinroller hilft dabei.**

4. **Ecken und Stöße schließen. Sauber auf Gehrung schneiden (Gehrungsschere) und mit CA-Kleber verkleben. Oder gleich Spezialecken verwenden.**

5. **Pflegen. Das Pflegespray hält die Dichtung lange elastisch.**

Das passende Zubehöhr finden Sie hier:

Welche Maße sind wichtig?

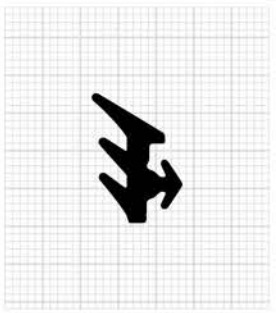

am Beispiel einer Verglasungsdichtung

Maß 1 – Länge des Fußes
vom Ansatz der Dichtlippe bis zum Ende des Fußes. So tief sitzt die Dichtung in der Nut.

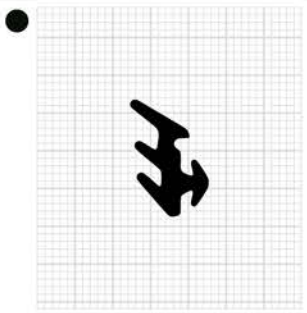

Maß 2 – Breite des Fußes
über die Rippen gemessen. Davon hängt ab, wie fest die Dichtung in der Nut hält.

Schicken Sie uns beide Maße zusammen mit einem Foto des Querschnitts – am genauesten messen Sie mit einem Messschieber. Weil sich viele Profile sehr ähnlich sind, prüfen wir im Zweifel lieber anhand eines kurzen Stücks Ihrer Dichtung.

Pflegetipps

So bleibt Ihre Dichtung lange elastisch

Reinigen: Wischen Sie die Dichtung mit lauwarmem Wasser und etwas mildem Spülmittel ab, am besten mit einem weichen Baumwolltuch. Ausbauen müssen Sie die Dichtung dafür nicht. Bei hartnäckigem Schmutz hilft eine Paste aus Natron und etwas Wasser.

Pflegen: Wenn die Dichtung trocken ist, geben Sie etwas Pflegespray auf ein fusselfreies Tuch und ziehen es über die Dichtung. Sprühen Sie nicht direkt auf die Dichtung, so bleiben Glas und Rahmen sauber. Gepflegte Dichtungen kleben bei Frost oder Hitze nicht am Rahmen fest. *Unser Pflegespray finden Sie auf S. 92.*

Wie oft? Ein- bis zweimal im Jahr, am besten im Herbst vor der Heizperiode und im Frühjahr.

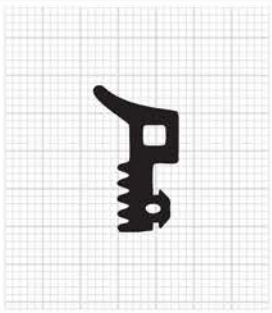

Bitte nicht verwenden:

- *Scheuermittel, Lösungsmittel wie Verdünnung, Benzin oder Aceton*
- *Öl- oder fetthaltige Mittel wie Vaseline oder Speiseöl, sie können das Material aufquellen lassen*
- *spitze oder scharfe Gegenstände*

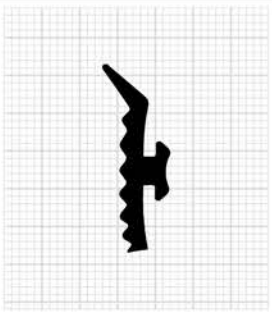

Zeit für eine neue Dichtung: Ist die Dichtung hart, rissig oder plattgedrückt, hilft auch Pflege nicht mehr.

Gehrungsschere: saubere Ecken

Exakte Gehrungsschnitte an Ecken und Rahmenverbindungen sind die Grundlage für einen dichten Dichtungseinbau. Passgenaue Gehrungen schließen ohne Spalt – Zugluft und Feuchtigkeit bleiben draußen.

Ihre Vorteile

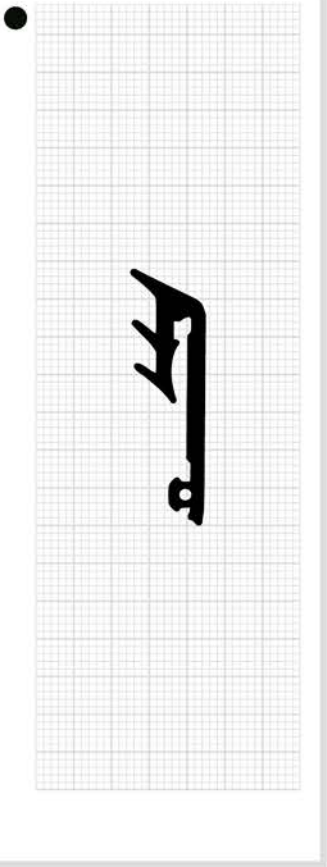

- Präzise Schnitte ohne Quetschen oder Ausfransen
- Spart Zeit bei der Montage
- Weniger Verschnitt, sauberes Ergebnis

> **Ganz ohne Gehrung?** Mit unseren vorgefertigten Spezialecken müssen Sie keine Ecken schneiden – mehr auf S. 120.

Häufige Fragen

Wie viel Dichtung brauche ich?

Messen Sie den Umfang Ihres Fensterflügels: 2 × (Breite + Höhe). Bei Verglasungsdichtungen zählt der Umfang der Glasscheibe, je einmal für innen und außen. Zählen Sie die Längen aller Fenster zusammen und runden Sie auf volle 5 m auf. Beispiele: Ein Flügel mit 1,00 m × 1,20 m braucht 4,40 m. Sie bestellen 5 m. Zwei Flügel mit 0,80 m × 1,00 m brauchen zusammen 7,20 m. Sie bestellen 10 m.

Bekomme ich auch kleine Mengen?

Ja. Bei uns bestellen Sie auch als Privatkunde und ohne große Abnahmemengen. Geliefert wird in 5-m-Längen oder im 25-m-Bund.

Welche Farben gibt es?

Die Farbpunkte bei jedem Artikel zeigen die Lagerfarben. Diese sind ab 5 m sofort lieferbar. Andere Farben fertigen wir als Sonderfarbe ab 200 m.

Was bedeutet „CC“ hinter der Artikelnummer?

Diese Dichtungen haben einen eingebauten Antidehnungsfaden. Er verhindert, dass die Dichtung beim Einbau gedehnt wird und sich später zusammenzieht. So entstehen keine Lücken an den Ecken.

Was bedeutet „mit Ausreißsteg“?

Manche Dichtungen haben einen schmalen Steg, den Sie bei Bedarf abreißen können. So passen Sie den Schließdruck an, wenn das Fenster mit der neuen Dichtung zu schwer schließt. Mehr dazu auf S. 55.

Gibt es Ecken passend zur Dichtung?

Für viele Profile bieten wir vorgefertigte Ecken an. Sie erkennen sie am Eckensymbol beim Artikel. Ecken sind nicht im Onlineshop erhältlich. Fragen Sie sie bitte über unser Anfrage- und Bestellformular an (S. 120).

Ich finde meine Dichtung nicht im Onlineshop.

Nicht jedes Profil aus dem Katalog ist online bestellbar. Nennen Sie uns einfach die Artikelnummer, wir liefern auch diese Dichtungen.

Ich weiß nicht, welche Dichtung ich habe.

Schicken Sie uns ein Foto der alten Dichtung im Querschnitt, am besten mit Lineal daneben, per WhatsApp oder E-Mail. Sie können uns auch ein kurzes Stück per Post schicken. Wir suchen den passenden Ersatz für Sie heraus. Tipps für das richtige Foto finden Sie auf S. 152.

Dichtungsrahmen und Ecken

Keine Lust auf Zuschneiden und Kleben? Viele Profile liefern wir auch als fertigen Rahmen oder mit vorgefertigten Ecken. Ob das für Ihr Profil möglich ist, zeigt das Eckensymbol beim Artikel.

So bestellen Sie

1. Profil im Katalog suchen und Artikelnummer notieren.
2. Formular ausfüllen: Artikelnummer, dazu Stückzahl und Maße (Rahmen) oder Stückzahl (Ecken).
3. Per E-Mail oder WhatsApp an uns schicken – wir melden uns mit einem Angebot.

Dichtungsrahmen – einbaufertig nach Maß

Sie messen Breite und Höhe, wir liefern den geschlossenen Rahmen – für den Flügel oder den Blendrahmen. Rahmen in die Nut eindrücken, fertig. Die Ecken sind sauber und dicht, es gibt keinen Stoß.

Dichtungsecken – ohne Messen

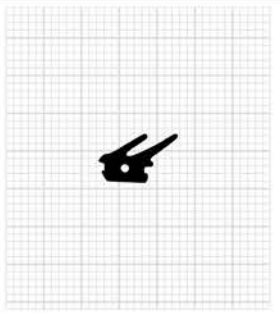

Sie erhalten vorgefertigte Flügel- oder Blendrahmenecken und dazu Meterware mit ca. 2 % Zugabe. Die geraden Stücke passen Sie selbst ein und verkleben die Stöße mit unserem **CA-Kleber**.

Zum Anfrage- und Bestellformular

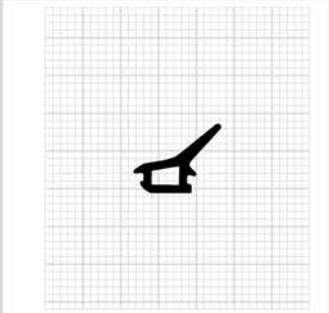

Digital ausfüllbar, einfach per E-Mail oder WhatsApp zurückschicken.

Mein Aufmaßblatt

Sie möchten mehrere Fenster abdichten? Drucken Sie diese Seite aus, tragen Sie Ihre Fenster ein und schicken Sie uns ein Foto davon – wir prüfen Ihre Angaben und melden uns mit einem Angebot.

Nr.	Raum / Fenster	Breite (m)	Höhe (m)	Umfang (m) 2 × (Breite + Höhe)	Dichtung (Artikelnummer)	Länge (m)
z. B.	*Küche*	*1,00*	*1,20*	*4,40*	*ADTP-1205*	*4,40*
1						
2						
3						
4						
5						
6						
7						
8						

Zusammenrechnen je Dichtung

Artikelnummer	Summe (m)	Bestellmenge auf volle 5 m aufrunden
ADTP-1205	*4,40*	*5 m*

Gut zu wissen: Hat ein Fenster mehrere Dichtungen, nutzen Sie pro Dichtung eine Zeile. Bei Verglasungsdichtungen zählt der Umfang der Glasscheibe. Geliefert wird in 5-m-Längen oder im 25-m-Bund.

So gelingt das Foto für unsere Profilsuche

Mit einem guten Foto finden wir Ihre Dichtung meist schnell – auch ohne Muster per Post. Darauf kommt es an:

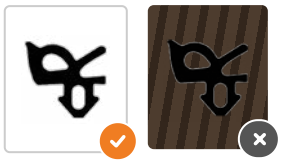

1 Schnittfläche zeigen

Dichtung gerade abschneiden und die Schnittfläche direkt von vorn fotografieren – nicht schräg und nicht von der Seite.

2 Lineal daneben

Ein Lineal oder einen Zollstock direkt neben die Dichtung legen. So können wir die Größe genau einschätzen.

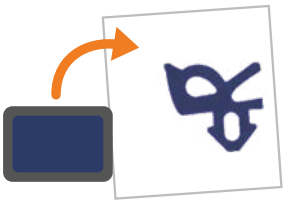

3 Heller Hintergrund

Ein weißes Blatt Papier als Unterlage – dann hebt sich die Form deutlich ab.

4 Scharf und hell

Bei Tageslicht fotografieren, ohne Blitz. Vor dem Senden prüfen, ob das Foto scharf ist.

Noch genauer: der Stempelabdruck

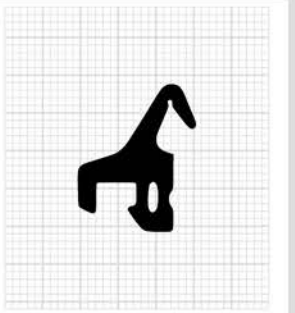

Drücken Sie die Schnittfläche auf ein Stempelkissen und stempeln Sie sie auf weißes Papier. Der Abdruck zeigt die Form in Originalgröße – ideal zum Fotografieren oder Mitschicken.

Foto per WhatsApp

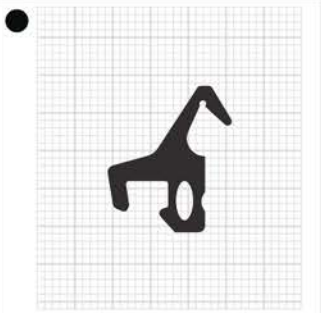

QR-Code scannen und Foto direkt senden.
+49 162 411 06 34
info@sos-dichtungen.de

Zusätzlich hilfreich: ein Foto vom ganzen Fenster und – falls vorhanden – vom Aufdruck im Falz des Fensterrahmens. Dort steht oft der Name des Fenstersystems.

Gleit- und Pflegespray

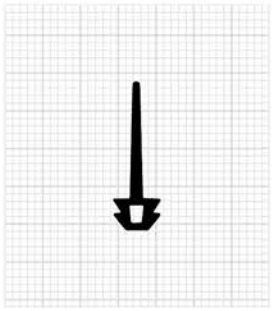

Silikonfrei. Hält Ihre Dichtungen lange elastisch und schützt sie vor UV-Strahlung und Ozon – so werden sie nicht rissig oder spröde.

Gepflegte Dichtungen kleben bei Frost nicht am Rahmen fest.

Dichtungen für Dachflächenfenster

Passend für Dachfenster vieler Hersteller – zum Beispiel Velux, Roto und Braas.

Dachfenster liegen schräg im Dach und bekommen Sonne, Hitze, Regen und Schnee direkter ab als jedes andere Fenster. Werden die Dichtungen hart oder rissig, zieht es oder Feuchtigkeit dringt ein. Ein neues Fenster brauchen Sie dafür nicht – die Dichtung lässt sich austauschen.

So finden Sie die passende Dichtung

1. **Typenschild ablesen**
   Hersteller und Typ stehen meist auf einem Schild am Fenster – oft erst sichtbar, wenn der Flügel geöffnet ist.
2. **Foto oder Muster schicken**
   Fotografieren Sie die Dichtung im Querschnitt mit Lineal daneben – oder schicken Sie uns ein kurzes Stück per Post.
3. **Angebot erhalten**
   Wir suchen den passenden Ersatz heraus und melden uns mit einem Angebot.

Im Onlineshop

Velux, Roto und Braas sind Marken ihrer jeweiligen Inhaber. Die Namen dienen nur der Zuordnung – unsere Dichtungen sind keine Originalteile dieser Hersteller.
Farben und Symbole der Kacheln: Legende auf S. 5.

NACH FENSTERHERSTELLER

Hersteller-Wegweiser

Hier finden Sie alle Profile dieses Katalogs, die zu Fenstern der genannten Hersteller passen – nach Hersteller sortiert, mit Seitenzahl. Viele Fenstersysteme wurden über die Jahre verändert: Vergleichen Sie deshalb immer die Form mit der Abbildung im Katalog. Im Zweifel schicken Sie uns ein Foto oder ein kurzes Stück Ihrer Dichtung – wir helfen gern.

Orange: im Onlineshop erhältlich – alle anderen Profile liefern wir auf Anfrage. Angaben ohne Gewähr.

Kontakt

Sie haben Ihre Dichtung gefunden – oder suchen noch? Wir helfen Ihnen gern weiter, persönlich und unkompliziert.

So finden wir gemeinsam die passende Dichtung

1 Foto schicken

Fotografieren Sie die alte Dichtung im Querschnitt, am besten mit Lineal daneben – per WhatsApp oder E-Mail. Tipps dazu auf S. 152.

2 Muster schicken

Schicken Sie uns ein kurzes Stück der alten Dichtung per Post – die Adresse steht unten.

3 Artikelnummer nennen

Sie haben Ihre Dichtung im Katalog gefunden? Dann reicht die Artikelnummer, zum Beispiel ADTP-1205.

Wir melden uns mit dem passenden Ersatz und einem Angebot bei Ihnen.

So erreichen Sie uns
